

ASSEMBLY INSTRUCTIONS FOR:

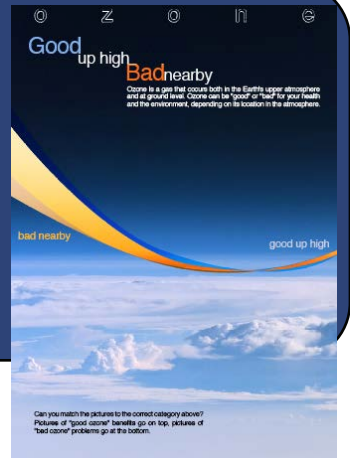

OZONE: GOOD UP HIGH, BAD NEARBY

SUPPLIES:

Scissors
Laminator
Velcro (white or clear dots work best)

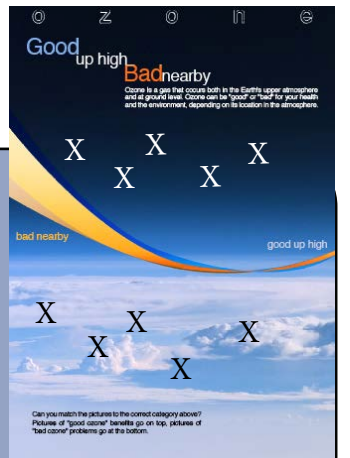

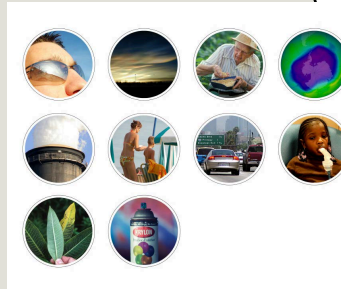

1

Print the Game board. Recommended size is 24 by 36. Adhere the print to a foam core board. I use Scotch Super 77 adhesive spray, but any glue should work.

2

Print the Game pieces and cut them out. Final game piece diameter should be close to 5 3/4 inches. If available, laminate the pieces. This will make the game look nicer and last longer.

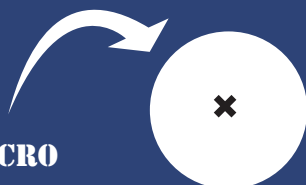

3

Attach one side of the velcro to the center of each circle on the backboard, shown here with X's.

4

Place a piece of Velcro on the middle of the back of your laminated pieces.

VELCRO
